Application/Control Number: 10/632,822

Art Unit: 2815

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Lum.

Lum shows a semiconductor device having a first layer 42, a plurality of first test elements 28, 29, 30 arranged on the first layer and a second layer 14 adhered to the first layer and is different from the first layer and a plurality of pads (not labeled) which are arranged in a bottom surface of said second layer.

A plurality of bumps 46 are shown arranged on said pads and a third layer 44 is shown adhered to the second layer via the bumps and solder balls 26 are shown arranged on the third layer and electrically connected to the first test elements. A plurality of second test elements 31, 32, 33, 34 are shown arranged on the first layer and electrically insulated from the pads. First and second connection members 40 are shown formed on opposing sides of the device.

Claims 1-6, 10 are rejected.

Claims 7, 8, 9, 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's election without traverse of claims 1-11 in the reply filed on 8-25-2004 is acknowledged.

Application/Control Number: 10/632,822

Art Unit: 2815

Corbett et al and Aigner are cited to show devices formed with test elements.

Any inquiry concerning this communication should be directed to S. V. Clark at telephone number (571) 272-1725.
